SUMMARY

QA Engineer with 4+ years of experience in software testing, test automation, and backend validation across e-commerce and enterprise platforms. Adept at building test frameworks, executing test cases, integrating CI/CD pipelines, and ensuring cross-browser compatibility. Proficient in Selenium WebDriver, JUnit, TestNG, Cucumber, Postman, MySQL, and JIRA. Experienced in Agile/Scrum environments and passionate about delivering high-quality, reliable, and user-friendly software.

SKILLS

Testing Tools & Frameworks: Selenium WebDriver, Cypress, Playwright, Appium, Rest Assured, JUnit, TestNG, Cucumber, POM, BDD, Postman, Allure, Extent Reports, TestRail, Zephyr

Languages & Scripting: Java, Python, JavaScript, TypeScript, SQL, Shell Scripting, Bash, HTML, CSS

Cloud Platforms: AWS, Azure, Google Cloud Platform (GCP)

CI/CD & DevOps Tools: Git, Jenkins, GitHub Actions, CircleCI, Bitbucket Pipelines, Docker, Kubernetes

Project & Test Management/Databases: JIRA, Confluence, TestRail, Zephyr, MySQL, JDBC

Testing Types: Manual Testing, Automation Testing, API Testing, Regression Testing, Smoke Testing, Sanity Testing, Functional Testing, Integration Testing, End-to-End (E2E) Testing

Performance Testing/Security Testing/Accessibility Testing: OWASP, Burp Suite, AXE, Wave, JMeter, LoadRunner

Cross-Browser & Device Testing: BrowserStack, LambdaTest

Operating Systems: Windows, Linux

EXPERIENCE

QA Engineer, CitiusTech, USA

February 2025 - Present

- Collaborated with BAs to define user stories and executed EMR test cases using Selenium and TestNG.
- Performed REST API testing using Postman to validate healthcare data integration between front-end and back-end systems.
- Conducted SQL queries to validate test data and perform database-level validations for claims, billing, and patient modules.
- Utilized AWS services to host and monitor QA environments, improving scalability and uptime for test deployments.
- Conducted JMeter routine testing to optimize claims workflows and executed test cases supporting BRD documentation.
- Performed accessibility testing with AXE, ensuring compliance with WCAG standards across patient and provider portals.
- Executed cross-browser testing via BrowserStack, ensuring consistent UI/UX across Chrome, Firefox, Safari, and devices.
- Automated critical regression test cases and integrated them with Jenkins pipelines, reducing release cycle time by 25%.

QA Engineer Intern, Cigna Healthcare Group, USA

March 2024 – January 2025

- Designed and executed 100+ test cases for Cigna's internal healthcare claims processing application and wellness portal.
- Performed regression, functional, smoke, and UAT testing to ensure application stability across modules.
- Validated REST APIs using Postman, confirming accurate data flow between frontend and backend systems.
- Collaborated with developers and business analysts in daily Agile scrums, sprint planning, and retrospectives.
- Logged and tracked 60+ defects in Jira, prioritizing issues based on severity and business impact.
- Assisted in preparing test plans, BRD/FRD reviews, and QA documentation to support project audits.

QA Engineer, Hexaware Technologies, India

August 2019 – July 2022

- Conducted functional, integration, and smoke testing for finance and insurance apps in an Agile Azure environment.
- Designed and executed 500+ automation scripts using Selenium, JUnit, and Maven, enhancing regression coverage by 60%.
- Performed performance testing with LoadRunner and security testing using Burp Suite to ensure application reliability and safety.
- Utilized LambdaTest for cross-browser testing, ensuring consistent UI/UX across devices and major browsers.
- Logged and tracked 100+ high-impact defects in JIRA and collaborated with developers for timely resolution.
- Worked with BAs to gather requirements, conduct GAP analysis, and prepare test scenarios and RTMs.
- Played a hybrid role in development and QA for a 100+ category e-commerce platform.
- Built UI components using HTML, CSS, and JavaScript, and optimized backend navigation with SQL queries.
- Conducted thorough UI/UX validation and resolved inventory sync bugs, improving order accuracy and retention.
- Proposed UX enhancements that boosted page load speed and raised customer retention by 15%.

EDUCATION

Master of Science - MS, Computer Science, California State University-San Bernardino

August 2022 – December 2024

Bachelor of Engineering - BE, Computer Science, Visvesvaraya Technological University, INDIA

August 2017 – June 2021

CERTIFICATIONS

Generative AI and AI Agents for software testing- Udemy

Python programming – Coders Arcade

Software Testing Bootcamp – Neo tech Academy

Selenium WebDriver with java and frameworks- Udemy
